

SUPER DRY

WHAT IS SUPER DRY?

Super Dry is a reactive resin-type drying additive for certain oil modified or oil based paints, stains and finishes. It will greatly aid drying and curing under adverse cure or drying conditions such as low temperature (50°F) and high humidity (more than 70%). How many times have you sent your crew out to a remote job for recoating only to find that the previous coat was not dry? Super Dry will greatly reduce if not eliminate these problems. **SUPER DRY IS NOT A JAPAN DRIER: IT REPRESENTS A TOTALLY DIFFERENT PRODUCT CONCEPT.**

HOW DO I USE SUPER DRY?

Add one pint Super Dry to each gallon of PoloPlaz oil-based finish, sealer, or paint while stirring. Mix only amount needed, as material will have a pot life of 24 hours. Tightly reseal container of Super Dry.

Apply material in normal manner and recoat after thorough drying (usually overnight). Store unused Super Dry in cool dry place. Once opened, use within two weeks.

DO NOT USE IN:

One Trip Pro Seal
Fast Dry Sealer or Fast Dry Stain & Seal
Waterborne Products
Moisture Cure Products
Magnum or Primero

WHAT ARE THE BENEFITS OF USING SUPER DRY?

- Ensures Drying in Adverse Conditions
- Adds Hardness to PoloPlaz Finishes
- Reduces Costly Drying Delays
- Reduces or Eliminates Polyballs

WHEN CAN I SUCCESSFULLY USE SUPER DRY?

Super Dry can be used whenever drying conditions are poor -low temperature and high humidity. Super Dry is no substitute for good finish practices: finish should never be applied when the ambient temperature/dew point temperature spread is less than 5° F. There is too great a danger that moisture has already condensed on the floor and thus contaminated it for coating. When possible, heat and air movement should be used to improve the drying conditions. This, in combination with Super Dry, ensures the floor is dry and ready for recoat as your schedule demands. It can be used in most oil based alkyd paints (gym game lines), in oil-based stains, and in the following PoloPlaz products:

- ✓ World Class Finish, 450, and 350
- ✓ World Class Sealer and Sanding Sealer
- ✓ Supreme Finish and Sealer
- ✓ Fast Break Game Line Paint
